

Scalping Policy

At Arean Global Markets Ltd, we strive to provide a transparent and efficient trading environment for all our clients. To ensure fairness and maintain market integrity, this Scalping Policy outlines the conditions under which scalping is permitted within our trading platforms.

What Is Scalping?

Scalping refers to a trading strategy that involves the rapid opening and closing of positions, typically within seconds or minutes, to profit from minor price fluctuations.

Arean Global Markets Ltd's Position on Scalping

1. Permissible Scalping

Arean Global Markets Ltd allows scalping as part of its commitment to offering flexible trading strategies. Traders using short-term strategies are welcome, provided they comply with our Terms and Conditions.

2. Fair Trading Practices

While scalping is permitted, trades must reflect legitimate market activity. Abusive or manipulative practices, including exploiting latency, off-market pricing, or other technical vulnerabilities, are strictly prohibited.

3. Trading Account Requirements

- Scalping is allowed on accounts designed for high-frequency trading.
- Certain account types or instruments may have restrictions or specific terms for scalping. These will be clearly outlined on the trading account or instrument specifications page.

Prohibited Activities

Arean Global Markets Ltd does not tolerate activities aimed at undermining market integrity, such as:

- Latency arbitrage.
- Unauthorized use of automated scripts or bots that exploit platform inefficiencies.
- Trading strategies that rely on consistently executing trades outside market norms.

Monitoring and Actions

Arean Global Markets Ltd actively monitors trading activity to ensure compliance with this policy. If any trades are deemed to violate the spirit of fair trading or involve prohibited activities:

- Such trades may be voided.

- Accounts may be subject to review, suspension, or termination.
- Profits derived from abusive practices may be withheld.

Communication

If we identify activity inconsistent with this policy, we will notify the trader with details of the issue and, where appropriate, provide a resolution plan.

Policy Updates

This policy is subject to periodic review. Updates will be posted on our website, and traders are encouraged to review it regularly.
